The Directorate of Education, Khomas Region, is very appreciative for the donation of the two classrooms by the Craton Foundation.

The Directorate would, therefore, like to thank Craton Foundation and its Directors for their decision and willingness to support the Ministry of Education in its effort to try to alleviate classroom shortages experienced in Khomas Region, more specifically in Windhoek.

The Directorate of Education expects that the facilities are taken good care of by learners, teachers, parents and the community at large. The school community is requested to treat and regard the facilities as their own and to guard them against vandalism and theft. They must keep the classrooms, including all other facilities belonging to the school, clean and tidy at all times.

Thank you, Craton Foundation, and we hope to see our partnership growing stronger and stronger.
